

Food Preference Questionnaire (FPQ) for Children

The Child Food Preference Questionnaire (CFPQ) is a caregiver-reported psychometric tool for paediatric populations to measure food preferences in the UK

The Child Food Preference Questionnaire (CFPQ) is a caregiver-reported instrument to assess six categories of food preferences in children (>3 years onwards) in the UK. It is an 84-item questionnaire with six subscales which are internally valid and have good test-retest reliability. The food items are grouped into six internally reliable and logical categories: vegetables, fruits, meat/fish, dairy, snacks, and starches.

Placing an order on XIP

To license this product, please select the **appropriate licence option** on the right-hand side of this page. Terms can be previewed from the "Preview terms" link.

To place an order, please locate the [Sign-in](#) or [Register](#) options on the top right side of this page. You can either sign in to your existing account or register for a new now. **Please note that your account should be created using your academic/ institutional e-mail address.**

Before completing an order and accessing the material, each order requires prior authorization, with processing times varying depending on the product.

For additional guidance on how to create an account and place an order, refer to the [FAQs](#).
